

Generate a \$10,000 Website with Just One Line of Code

[by @sebastienjefferies](#)

What You'll Learn

How to generate a **complete, professional website** using a single line of code, by leveraging tools like **Claude Code**, **Framer Motion**, and **UI/UX skills**.

Tools You'll Need

1. [Claude Code](#) – For generating the website code with a single line.
2. [Framer Motion](#) – To handle animations and smooth transitions.
3. [UI/UX Skill](#) – To ensure proper design structure.
4. [21st dot dev](#) – To copy the required line of code and integrate it into Claude Code.

Step-by-Step Instructions

Step 1: Install Claude Code

1. Install **Claude Code** on your system.
2. Go to the URL for Claude Code and **copy the provided line** of code.
3. Paste it into your **terminal** to initialize the process.

Step 2: Install Framer Motion

1. Install **Framer Motion** to manage **animations** on your website.
2. This will allow smooth transitions and interactive elements for a polished, professional look.

Step 3: Add UI/UX Skills

1. Download a **UI and UX skill** to ensure the system understands design structure.
2. This will guide the AI to generate **clean design** with proper user experience and interface patterns.

Step 4: Integrate with 21st dot dev

1. Go to **21st dot dev** and **copy the required line of code**.
2. Paste it into **Claude Code**.
3. The system will generate a **complete website**, including **smooth animations**, **clean design**, and **structured layout**.
