What Can You Build?

Render helps you deploy and host:

Web Applications

- React
- Next.js
- Vue
- Angular

Backend APIs

- Node.js
- Python
- Go
- Ruby
- Java

Databases

- PostgreSQL

Background Workers

- Cron Jobs
- Scheduled Tasks
- Data Pipelines

Full Startup Infrastructure

- Frontend
- Backend
- Database
- Deployment

All from a single platform.

Special Track

Best Use of Render Workflow

Teams competing for this track must use:

Render Workflows - <https://render.com/workflows> as a core part of their project architecture.

Winners Will Receive:

 **1st Place**
\$500 Render Credits

 **2nd Place**
\$300 Render Credits

 **3rd Place**
\$100 Render Credits

BuildX Recommendation

If you're building:

- SaaS Products
- AI Applications
- Startup MVPs
- Developer Tools
- Marketplaces
- Productivity Apps

Render can handle your deployment and infrastructure requirements.

Good luck building.
